

BODY NOVA FITNESS COACHING PRESENTS:

Super Hero Physique Program

FOR WOMEN

This portion of your Super Hero Physique Program isn't just about trying to lean you out as fast as possible, it's about setting you up for future progress by empowering you with the ability to work hard. If you can't work harder than you have been able to in the past, nothing will change. People forget that fitness is based on your ability to do work, so if you're stuck in a plateau, it's at least partially because, you haven't contributed to your ability to do work. One of the ways you can do this is by burning more calories due to recruiting more muscle, or lifting heavier weights. You can also burn more calories because you've lifted the same weight for more reps. Increased strength does all that and more. Traditionally, this would be the type of program your favorite physique athlete or fitness model would start in their off-season. When it's warm, you wear less clothing so it's time to lean out and look good, but when it's cold (for example, 45 degrees or colder), it's highly unlikely that you'll be outside in a bathing suit, or even a tank top and shorts. Let the late fall, winter, and Early Spring months set the stage for you to look great when it counts.

Day 30 & 31 OFF 12, 10, 8, 6, 15+POF

You'll perform 1 set of 12, rest, 1 set of 10, rest, 1 set of 8... until you finish a set for all the reps of an exercise. I'd start the set of 12 reps with a weight that I could lift 15 times, because the short rest periods will catch up to you. You will subtract 10 seconds off from the rest periods every time you repeat these workouts. For example, workout 1 60 seconds, workout 2, 50 seconds, and for workout 3, the rest period will be 40 seconds.

At this point in the process, now we've built up your ability to work hard, and we've built some muscle in places that will allow you to have something to show off. Now it's time put those gains that you've made in the first two microcycles (training phases) to use. You now have increased your ability to burn fat, and shake the body up in a way that will allow you to build muscle. This workout program should coincide with a cutting phase. The goal here is to trim as much body fat as possible. On the flipside, you should also be able to build muscle during this phase, even though it's not the primary goal. Superheroes are all made of something special. Some of them are bulletproof. I'll hit ya with this 50 Caliber program, and I expect to see you look fabulous in 6 weeks.

50 Caliber Workouts

You'll choose a weight that you can perform 10-12 reps with, and you'll perform 8 reps for each exercise in the circuit unless otherwise noted, until you reach 50 reps. Once you reach 50 reps for an exercise, then you're finished, and that exercise will drop out of the circuit. After the 2nd week increase the target reps to 60, and then to 65 for the 4th week.
